

FOR IMMEDIATE RELEASE

## **Casero Upgrades Vault Suite to Strengthen Backup Security for PC Data and Files**

*Solution ensures the safety of valuable data*

**TORONTO – October 2, 2007** – [Casero Inc.](#), a leading provider of white-label and web 2.0 products for service providers, today announced the addition of the [Backup Manager](#) module to the [Casero Vault Suite](#). The new module is a core application that provides full protection of user's PC data and files through automatic and continuous backups. The Backup Manager module rounds out the Casero Vault Suite and ensures important data will be protected from loss, corruption and theft.

The Casero Vault Suite Backup Manager upgrade offers the ability to password protect contents on multiple PCs, and includes automatic scheduling of content backup for secure storage. Additionally it provides bandwidth throttling and block level incremental backups. Service providers now have a protected and secure online solution, ensuring the safety of user's most valuable data.

The Casero Vault Suite allows service providers to offer a complete storage and protection solution for user's priceless memories and personal data. This unique solution forms the cornerstone for Casero's vision of the next generation web 2.0. It delivers a centralized location for subscribers to store, share, manage and access their personal media for all devices. Casero's Vault Suite is supported by one underlying service delivery platform so service providers can leverage a common infrastructure which helps create a more seamless experience, with a quick time-to-market.

Casero's white-label solution is interoperable through a single point of integration into several of the world's leading broadband services providers, including Bell Canada and BT.

### **About Casero**

Based in Toronto, Casero Inc. is a privately held software company that delivers white-label solutions to service providers, allowing them to deploy branded, value-add services to their consumers. Casero's flagship product, the Casero Vault Suite, allows subscribers to store and protect their priceless memories and personal data. Current customers include Bell Canada and BT.
